SUMMARY

Software Engineer with professional experience working in Frontend Development using React.js and strong fundamentals of backend development using MERN stack. Skilled in building responsive user interfaces, integrating APIs and developing web applications with database-backed features. Currently expanding my skills in AI application development and LLM-powered workflows.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Typescript, HTML5, CSS3, JavaScript (ES6+)

Backend: Node.js, Express.js, REST APIs, JWT authentication, Python

Database: MongoDB

AI: Agentic AI (Currently learning), LangChain, LangGraph

Tools: Git & GitHub, Postman, Chrome DevTools

EXPERIENCE

LearnerVerse *Feb 2026 – Present*

Technical Content Creator — Web Development · Remote

- Developing technical learning content covering modern web development.
- Independently managing the full content pipeline from scripting to publishing, maintaining consistent output quality.

PITP Phase II — NED University *Sep 2025 – Mar 2026*

Web Development Course Instructor · Karachi

- Designed and delivered web development lessons covering frontend and full-stack concepts.
- Mentored students on building real-world projects, debugging code, and following clean code standards.

NexBash *Sep 2024 – Oct 2024*

Junior Software Engineer · Remote

- Contributed to a file management web application using React.js, Typescript, and Material UI, implementing Redux Toolkit for state management.
- Worked on React Native e-commerce mobile application using RTK Query for API data fetching and state management.

NCL Lab — NED University *Mar 2023 – Apr 2023*

Web Developer · Karachi

- Developed the Agha Khan Hospital Ophthalmology Department's website from scratch using HTML, CSS, and JavaScript.
- Implemented a fully responsive layout tested across mobile, tablet, and desktop viewports.

PERSONAL PROJECTS

Habitrea AI | *Next.js · Supabase · PostgreSQL · Gemini API (In Development)* Live Demo | GitHub

- Building a full-stack habit and task management platform that analyzes user behavior and provides personalized AI-generated insights.
- Integrated Gemini AI API to generate contextual recommendations based on users' habits and tasks data.

E-Commerce Platform | *React · Node.js · MongoDB · Express.js · Redux Toolkit · RTK Query* Live Demo | GitHub

- Built a full-stack MERN ecommerce web application featuring product catalog, shopping cart and checkout flow.
- Developed a custom admin dashboard for product and order management, integrated Cloudinary for efficient media storage to optimize MongoDB performance and scalability.

Industrial Motors Health Dashboard | *React.js · Flask* Live Demo | GitHub

- Developed a monitoring dashboard for industrial motors (Agri Auto and Dawlance), that visualizes Machine Learning insights for predictive maintenance.
- Engineered an intuitive interface that transforms motors' health data into actionable visual alerts to minimize production downtime.

EDUCATION

NED University of Engineering and Technology *Oct 2020 – Oct 2024*

Bachelor of Engineering — Computer Systems Engineering (CGPA: 3.63)
